October 2, 2006

As you are well aware, commodity costs in general have increased significantly throughout 2004, 2005 and 2006. Specifically, as it relates to Nickel, the September 2006 LME Nickel Cash Average Price was above our Nickel Base price of \$3.00/LB. Consequently, the following Nickel surcharges will apply for all orders shipped during October 2006.

For illustration of how the Nickel surcharge is calculated, September's LME Nickel Cash Average Price was \$13.6672/LB. This yields an 80% Nickel wire surcharge as follows:  $(\$13.6672 - \$3.00) \times 1.15 \times 0.80 = \$9.81$  per pound of coiled wire. The 15% adder is present to cover the transaction fees, [contango](#) charges, insurance and delivery of the nickel material. It is also to cover the losses of material that occur when melting known as "stack losses". Always confirm the price of nickel applied to your transaction when dealing in any product based on the price of nickel.

Alloy Name	Common Names	Surcharge (\$/LB)	Nickel %
1JR	No. 1 JR Alloy (Types 1, 2 and 4); Alkrothal 720	\$0.00	0%
294	Cuprothal, Alloy 294, Cuprothal 294, Nico, MWS-294, Cupron, Copel, Alloy 45, Neurology, Advance, CuNi 102, Cu-Ni 44, Konstantan	\$5.52	45%
